HOW TO LOOKING SHARP

CLUB COUTURE™ PROJECT

Supplies Needed

Club Couture™ Transfer: Looking Sharp

Chalkology™ Paste Singles: Storm, Almond, and Guava

Tools: Small Squeegee, Multi-Tool, Transfer Trimmers, Fuzzing Cloth, Self-Healing Work Mat, and permanent marker

Surface: Board & Base (5½" x 7½")

Color and Placement for Club Couture™: Looking Sharp

1. Hedgehog body: Storm

2. Head: Almond

3. Nose, cheeks, and words: Guava

Follow these instructions to complete the Club Couture™ project:

1. Prepare your Chalk Transfer™ by removing it from the packaging and cut apart the individual elements. Label the backer papers with marker to correspond with the image. This makes cleanup easier.

2. When you remove the backer from the Transfer screen, be sure to "fuzz" each element to gentle the adhesive by sticking the adhesive screen to a Fuzzing Cloth or terry cloth towel to pick up a bit of lint before applying it to your board.

3. Position your first Transfer element and smooth to adhere to your surface, ensuring there are no bubbles.

4. Prepare your Chalkology™ Paste by kneading the packet, tearing off corners, and squeezing desired amounts onto dish or other palette surface. Stir paste if using 3 US fl. oz. jar.

5. Use a generous amount of Chalkology™ Paste on the Small Squeegee and smooth it over the Transfer (see color and placement suggestions). Make sure to apply paste to the registration marks, so you can line up Transfer elements.

6. Once the screen portion of the design is completely covered, squeegee the excess paste off as evenly as possible and scrape unused paste back into the jar or palette. The more excess paste you remove, the better the result.

AUGUST CLUB COUTURE TRANSFER: LOOKING SHARP

7. Carefully peel back the Transfer before the paste dries and immediately put it in water to clean thoroughly. Once clean, let dry with sticky side up.

8. For best results, wash and dry each Transfer element and the Squeegee before reusing.

9. Allow sufficient dry time of your surface (or use a hair dryer to speed drying) before layering subsequent steps.

10. Proceed with the next element of your design. Line up the Transfer element using registration marks.

11. Repeat these basic techniques as with all elements of your design. Use a damp cloth to remove registration marks when you're done.

12. Once all the Transfer elements are clean and dry, reapply all backers and store flat.
