

HOW TO CHALK BOX™ KIT

GNOME

Included in your Chalk Box™ kit:

Chalk Couture™ Transfer: Gnome

Chalkology™ Paste Singles: Bright White, Couture Teal, Almond, Storm, Candy Apple, Tide, Black Velvet

Surface: Couture Boutique™ Board Silvie White Frame (Black, 9" x 12")

Additional supplies needed:

Fuzzing Cloth	Mini Squeegee
Multi-Tool	Transfer Trimmers
Small Squeegee	Permanent Marker

Follow these instructions to complete the Chalk Box™ project:

1. Prepare your board by wiping it clean of any debris or dust.
2. Prepare your Chalk Transfer™ design by removing it from the packaging and cut apart the individual elements. Label the backer papers with marker to correspond with the image to expedite cleanup.
3. Remove the backers from the Transfer screens and “fuzz” each element to gentle the adhesive by sticking the adhesive side to the Fuzzing Cloth to pick up a bit of lint before applying it to your board.
4. Prepare your Chalkology™ Paste by kneading the Paste Single packets, tearing off corners, and squeezing desired amounts onto dishes or other palette surfaces.
5. Position the element “THERE’S NO PLACE LIKE GNOME” at the bottom of the board and smooth it out. Use a generous amount of Bright White Chalkology™ Paste on the Small Squeegee and smooth it over the word “GNOME.”
6. Once the screened area is completely covered, squeegee the excess paste off as evenly as possible. The more excess paste you remove, the better the result.
7. Load the Mini Squeegee with Couture Teal Chalkology™ Paste and chalk the words “There’s no place like” part of the Transfer element. Peel the Transfer element off and clean with water.
8. Position the gnome element A1 above the words. Use a clean Squeegee to smooth Almond Chalkology™ Paste over the face and ears, Couture Teal Chalkology™ Paste over the coat, and Storm over the boots. Don’t forget to chalk the registration marks. Peel the Transfer off of the board and clean with water. Allow the layer to dry thoroughly.
9. Position the A2 element using the registration marks. Use a clean Squeegee to smooth Candy Apple Chalkology™ Paste over the hat and Tide over the belt and pants. Peel the Transfer off of the board and clean with water. Allow layer to dry thoroughly.
10. Position the A3 layer using the registration marks. Use a clean Squeegee to smooth Bright White over the element. Peel the Transfer off of the board and clean with water. Allow layer to dry thoroughly.
11. Position the A5 layer using the registration marks. Use the Multi-Tool to smooth Candy Apple Chalkology™ Paste on the nose and a clean Squeegee with Storm Chalkology™ Paste on the cheeks. Peel the Transfer off of the board and place it in the water bath. Allow layer to dry thoroughly.
12. Position the B2 layer as desired. Use a clean Squeegee to smooth Bright White Chalkology™ Paste over the stem and dots. Make sure to chalk registration marks.

13. Move the element around as desired and repeat (we recommend at least one mushroom on each side of the gnome) and smooth paste over the screen. Then peel the Transfer off of the board and clean with water. Allow all of the layers to dry thoroughly if you layer mushrooms.
14. Line up the BI element using the registration marks. Use a clean Squeegee to smooth Candy Apple Chalkology™ Paste over the element. Move the element around to correspond with the mushroom stems and smooth paste over the screen. Peel the Transfer off of the board and clean with water. Allow all of the layers to dry thoroughly before starting a new layer.
15. After all Transfer elements are thoroughly clean, lay them flat to dry sticky side up.
16. Once the elements are completely dry, reapply the backer and store flat.
