

HOW TO FALL BLESSINGS

CLUB COUTURE™ PROJECT

RELEASED SEPTEMBER 2020

Supplies Needed

Club Couture™ Transfer: Fall Blessings

Chalkology™ Paste Singles: Shimmer Copper, Currant Jam, Pesto

Chalkology™ Paste: Bright White (included in the optional Kickstart Kit)

Tools: Mini Squeegee, Small Squeegee, Transfer Trimmers, Color Trays, Fuzzing Cloth

Surface: Couture Gallery™ Aiden White Frame (9" × 12")

Color and Placement for Club Couture™

1. *Fall:* Ombré effect with Shimmer Copper and Currant Jam
2. *Blessings:* Bright White
3. *Wheat accents:* Pesto

Follow these instructions to complete the Club Couture™ project:

1. Prepare your Chalk Transfer™ by removing it from the packaging and cut apart the individual elements. Label the backer papers with a marker to correspond with the image; this makes cleanup easier.
2. Before using each Transfer element, be sure to gently "fuzz" it to the adhesive by sticking the adhesive screen to a Fuzzing Cloth or terry towel to pick up a bit of lint before applying the Transfer to your board.
3. Center the word "Fall" on the board and smooth it out to adhere, ensuring there are no bubbles.
4. Prepare each Chalkology™ Paste by kneading the packet, cutting or tearing off the corner, and squeezing the desired amount onto one of your Color Trays or another palette surface. Stir the paste if using 3 US fl. oz. jar.
5. Use a generous amount of Chalkology™ Paste on a Small Squeegee and smooth it over the top half of the letters (see color and placement suggestions). Use a clean squeegee to chalk the bottom half of the letters in a different color and blend the two colors together with your finger.
6. Once the screen portion of the design is completely covered, squeegee the excess paste off as evenly as possible and scrape unused paste back into the palette. The more excess paste you remove, the better the result will be.

SEPTEMBER CLUB COUTURE™ TRANSFER:
FALL BLESSINGS

7. When finished, slowly peel back the Transfer before the paste dries, and immediately clean the Transfer with water.
8. Once clean, let the Transfer dry with the sticky side up.
9. Allow sufficient drying time of your surface (or use a hair dryer to speed up drying) before layering subsequent steps.
10. Repeat these basic techniques with all elements of your design.
11. Once all the Transfer elements are clean and dry, reapply all backers and store flat.
