

# HOW TO CHALK BOX™ KIT

## SOUTHWEST COLLECTION—WANDER FLORALS

### Included in your Chalk Box™ kit:

**Chalk Couture™ Transfer:** Southwest Collection—Wander Florals

**Chalkology™ Paste Singles:** Peony, Storm, Tide, Guava, Eucalyptus

**Surface:** Pallet Sign (9" x 12")

### Additional supplies needed:

Fuzzing Cloth

Mini Squeegee

Multi-Tool

Transfer Trimmers

Small Squeegee

Permanent Marker

### Follow these instructions to complete the Chalk Box™ project:

1. Prepare your board by wiping it clean of any debris or dust.
2. Prepare your Chalk Transfer™ design by removing it from the packaging and cut apart the individual elements. Label the backer papers with marker to correspond with the image to expedite cleanup.
3. Remove the backers from the Transfer screens and "fuzz" each element to gentle the adhesive by sticking the adhesive side to the Fuzzing Cloth to pick up a bit of lint before applying it to your board.
4. Position the word "Wander" on the top third of the board and smooth it down to adhere, ensuring there are no bubbles.
5. Prepare your Chalkology™ Paste by kneading the Paste Single packets, tearing off corners, and squeezing desired amounts onto dishes or other palette surfaces.
6. Use a generous amount of Storm Chalkology™ Paste on the Small Squeegee and smooth it over the word. Peel the Transfer off of the board and clean it with water.
7. Place the largest floral element on your board (we recommend placing at slightly off-center) and smooth Tide paste across the flower element using a clean Squeegee. This will "anchor" your design. Peel and place in water bath.
8. Customize your floral arrangement or use the following suggestion. Place the "vine" piece just to the right of the large flower and smooth Eucalyptus paste using a squeegee (we suggest using this element twice, once on each side). When you're done with this element, clean with water.
9. Add color and flowers by placing elements to taste and smoothing Chalkology™ Paste using a Squeegee. For each element squeegee the excess paste off as evenly as possible, peel the Transfer, and clean elements with water as you finish.
10. When placing or layering elements, ensure the bottom layer is thoroughly dry before placing top-layer elements.
11. After all Transfer elements are thoroughly clean, lay them flat to dry sticky side up.
12. Once the elements are completely dry, reapply the backer and store flat.
